

SIDCAIN

5th Annual SIDCAIN Update Course, Guest Lecture & Scientific Conference

Theme:

Diabetes in Nigeria- Challenges and Opportunities

Sub-Theme:

Focusing on New Insights in the Prevention and Management of Diabetes - Application of Dedicated technologies

**Osogbo
2016**

Date: 2nd - 4th March, 2016

Venue: Main Auditorium, Osun State University, Osogbo, Osun State.

We write to formally invite you to participate in the forthcoming STRATEGIES FOR IMPROVING DIABETES CARE IN NIGERIA (SIDCAIN) 2016 annual scientific conference and distinguished personality lecture holding in Osogbo from March 2-4, 2016.

The SIDCAIN research group has successfully completed World Diabetes Foundation assisted projects in Ogun and Oyo States, while that of Osun State is ongoing. In Ogun and Oyo States, a total of 56 non-communicable disease clinics have been established and 1180 health workers have already been trained to man these clinics where projects have been completed.

Over the years, our activities have expanded to include public awareness programmes, establishment of school health clubs and the Journalists Action Against Diabetes Programme amongst others. We also hold the annual non-communicable disease conference and distinguished personalities lectures. Previous events have held in Ibadan, Osogbo and Sagamu whilst personalities such as Are Afe Babalola, Prof. John Idoko (NACA), Chief Olusegun Obasanjo and Mr Dele Momodu have given the lectures.

The 2016 event will hold at the Main Auditorium of the Osun State University. The event, as with previous ones will attract participants from all over the country as well as overseas.

We look forward to welcoming you to this exciting meeting.

Kind Regards,

Prof. Babatope Kolawole, FWACP - 2016 LOC Chair
Dr Oluranti Familoni, FMCP - 2016 co-Chair
Dr Jokotade Adeleye, FWACP - 2016 co-Chair
Prof. Olutayo Alebiosu, FWACP - SIDCAIN Coordinator
